About me

With a bachelor degree on professional programming and with a strong foundation in .NET development and Javascript, seeking an internship/junior opportunity to apply, further develop my backend programming skills and learn new technologies.

Experience

Web developer — Sharp group May- 2025 - November - 2025
Responsibilities: Developing Javascript apps.

EDUCATION

Shkolla e mesme — Hivzi Sylejmani 2018 - 2021

BACHELOR — AAB College 17/08/2021 - 01/06/2024

MASTER — AAB College 05/12/2025 - ~

Skills

C#
Javascript
ASP.NET CORE
MSSQL
GIT, GITHUB
Entity Framework

LANGUAGES

ENGLISH · B2+

Projects

ShortUrl

ShortUrl - URL shortener built with ASP.NET Core, C#, and Entity Framework Core (Code First), following Clean Architecture and the Repository Pattern. Implemented authentication and role-based authorization with ASP.NET Core Identity.

ExplorKosova(SmartCity)

ExploreKosova (SmartCity API) - Backend for a tourist exploration app for Kosovo, built as a university project for a Location-Based Applications course. Developed a RESTful API with ASP.NET Core Web API, C#, and Entity Framework Core using Clean Architecture, with repositories, DTOs, AutoMapper, and JWT authentication. If you want to add what the app does for users (for example, finding nearby places or filtering by category), send me the main features and I'll add one line. I also left out the React frontend because I'm not sure how much of it you've built.

Book Management System

Backend application built with ASP.NET Core, C#, and Entity Framework Core (Code First), following Clean Architecture and the Repository Pattern. Implemented a Service layer with a Repository pattern. Implemented authentication with ASP.NET Core Identity, and unit tests with xUnit and Moq.

ProductManagementSystem

Backend application built with ASP. NET Core, C#, and Entity Framework Core following Clean Architecture. Implemented cookie-based authentication and role-based access control with ASP. NET Core Identity, including admin seeding, and documented the API with Swagger.

StockManagment

Web application for managing inventory, built with ASP. NET Core MVC, C#, and Entity Framework Core. Implemented user authentication and authorization with ASP. NET Core Identity. Source code on GitHub.
